# STOCK MARKET **WEAK AT CLOSE**

Prices Collapse Violently, with Scattered Rallies by Shorts.

## RATE DECISION FEARED

Western Maryland R. R., Breaking to New Low Figure, Creates Stir in Street.

New York, July 13. - Prices collapsed New York, July 13.—Prices collapsed violently in today's stock market. The closing was weak with rallies here and there on short coverings. Liquidation apparently is still unfallshed, support is lacking and the outlook disquietins.

There is a strong opinion current on the street that the rate decision on the question of the sper cent freight rate advance will be unfavorable to the railrosds, and that fore-knowledge of this formed the basis of the present selling movement.

movement.

At the opening the market was fairly stendy, with notable strength in Union Pacific, Southern Pacific and Steel common. Canadian Pacific sold at 190, when with a selling order that broke the price to 188, at which figure he offered 5,000 shares. Temporary support appeared in buying orders from London, but the selling continued and Harris, Winthrop & Co. added to the pressure. The price broke to 185.5-8, a new low figure and some eighty points below the high rec-ord of 1912.

### General Scattered Selling.

Scattered selling appeared in other stocks. New York Central fell nearly three points. Without the privilege of increasing freight rates the outlook for the stockholders in this property is ineed gloomy. Recent heavy selling of New Haven

Rock Island Issues and Denver and Rio
Grande is were heavy.

If the Interstate Commerce Commission
decides not to permit railroads to increase the selling price of transportation, the public will not supply funds for
equipment, new lines or organization.
Dividenda will be either reduced or
pussed.

Time funds are stronger on the poor bank position revealed in Saturday's statement. The expected delay inaugurating the new reserve resistent is a lab creating some sentiment in favor of afrirer conditions. Business is still restricted to a few trades.

Rates are 2% per cent for sixty days; 2%,35 per cent for unnerty days; 23% per cent for four months; 3% per cent for sixty per cent for longer maturities. The low surplus reserve repressed on Saturday is discouraging banks from purchasing paper. This circumstance coupled with the absence of the officers who buy for some of the leading institutions is keeping the market firm. Hates range from tably per cent for the best names, according to maturity.

> Orders Issued Sending 700 Marines to Guantanamo, Ready to Invade Haiti and Sister Republic.

### TO END ANARCHICAL CONDITIONS

Recognising the necessity of taking action with regard to the anarchical conditions in Haiti and Santo Domingo, the administration last night announced the sending of 700 marines to Guantanamo, Cuba, to be held in readiness for a quick movement into either country. Three bundred of these marines will be taken from the forces now at Vera Cruz, 18 from the brigade ashore, and the balance from the battleships Texas and New York, which have extra marine detachments aboard. The transport Hancock, after taking these marines from Vera Cruz to Guantanamo, will proceed to Norfolk and there take on board 40 more marines for Guantanamo.

The gunboat Sacramento, now at Vera Cruz, will proceed to Port au Prince. The battleship Connecticut is lying off the Haitian port, and the battleship South Carolina is at Santo Domingo City, the cruiser Washington and gunboat Marchias, at Puerto Piata, Santo Domingo, and the gunboats Marietta and Castine are covering other Haitian and Dominican ports.

In addition, it is known that for months European governments have been much exercised by the in-creasing anarchical conditions. As long as mediation proceedings re-garding Mexico were going on, the ad-ministration felt constrained from re-sorting to the use of force in any Latin-American country, and though mediation

not believed in Washington that the

Wonderful Reversal of Public Sentiment Since the Capture of

The militaristic spirit in the United States, notably advanced by the capture of vention in Mexico, is reflected in the two "war budgets"—the army and navy appropriation bills—which have been formulated by the present Congress.

The peace movement is neither dead nor decadent, according to those who guide its destines, but it is significant that the Democratic party today is thoroughly committed to a "big navy" policy. Twelve months ago the "one best bet"

The occupation of Vera Cruz by American bluejackets, marines, and troopers, with its toil of nineteen dead and seventy injured (a loss greater than the navy suffered in the entire Spanish-American War) has produced a marked effect upon public opinion, and there has been practically no effort in Congress this year to reduce the army and navy bills. Last year a determined group in the House of Representatives eliminated the "two battle ships a year" policy from the navy budget and provided for the construction of only one dreadnought a year. Navy men despaired of having this program changed during the present administration. They felt it was a fixed policy, with the backing of the dominant Democratic of President Wilson and Secretary of the Navy Daniels. There was no denial of the Navy Daniels. There was no denial of the construction of President Wilson and Secretary of the Navy Daniels. There was no denial of the construction of President Wilson and Secretary of the Navy Daniels. What a reversal has taken place in public thought and official policy within the year. There was, during the debate on the navy appropriation bill, no thought of further recession from the "two battle ships a year" program, and the administration has gone even further. Through a piece of shrewd bargaining with Greece, three dreadnoughts will be constructed this year. The battle ships Mississippi and Idaho have been sold at cost price to the little nation in Southeastern Europe, the dreadnoughts will be used for the construction of a new ship. Greece work, and the money thus acquired will be used for the construction of a new ship.
